

# Hearing Aids

## South Valley Ear Nose & Throat

**48 million Americans experience hearing loss severe enough to hinder communication. Let South Valley Ear Nose & Throat help restore your hearing.**

Perhaps you've thought about getting a hearing aid, but you're worried about how it will look and wonder whether it will really help. Knowing more about the hearing aid options available to you, what to look for when buying a hearing aid and how to break it in may help alleviate some of your concerns.

Let us work with you to present a hearing solution based on your personal budget and lifestyle. We are confident you'll be satisfied with South Valley Ear Nose & Throat hearing aids which are customized, powerful and reliable.

### Receiver in the Ear

- Mild to moderate hearing losses
- Leaves ear canal open for a natural sound quality
- Smallest external hearing aid
- Case sits behind the ear practically invisible

### Receiver Behind the Ear

- Mild to severe hearing losses
- Fully featured hearing aids
- Easier for wearers with dexterity needs

### High-Power Receiver

- Profound hearing loss
- Greatest levels of amplification
- Larger case worn behind the ear

### Completely in the Canal

- Mild to moderate hearing losses
- Very small case
- Fits inside the ear canal, making it practically invisible
- Size prevents the use of directional microphones

### In the Canal

- Mild to moderately severe hearing losses
- Small, one piece case
- Fits inside the ear canal
- Directional microphones are possible with this model

### Half Shell

- Mild to severe hearing losses
- Small case
- Fits inside the ear canal, and is partially visible
- Directional microphones
